Synopsis

B.Tech CSE graduate from RGUKT RK Valley with hands-on experience in Python, Machine Learning, and NLP. Built AI multi-chatbot using Streamlit and Gemini API, and developed ML models using scikit-learn. Skilled in data preprocessing, model training, evaluation, and prompt engineering. Strong in problem-solving, communication, and team collaboration. Seeking roles in AI, Data Science, or Machine Learning.

Education

- **RGUKT RK Valley** Graduation Year: 2025
Bachelor of Technology in Computer Science and Engineering (CGPA: 8.2) Andhra Pradesh
- **RGUKT RK Valley** 2019 – 2021
Pre-University Course (CGPA: 9.34)
- **ZPHS Kanipakam** 2018 – 2019
Secondary School (CGPA: 10.00)

Technical Skills

Programming Languages	: Python, Java(Basics)
Libraries & Frameworks	: NumPy, Pandas, Matplotlib, Seaborn, scikit-learn, Streamlit
Domains	: Machine Learning, Natural Language Processing
Databases	: MySQL
Core Subjects	: Computer Networks
Tools/Platforms	: Git, GitHub, VS-Code, Jupyter Notebook
Soft Skills	: Teamwork, Problem-solving, Communication

Projects

AI Multi-Chatbot Web Application

Technologies: Python, Streamlit, Gemini API, NLP

- Built a multi-feature AI chatbot integrating five NLP tasks: Email Spam Detection, Sentiment Analysis, Text Summarization, Grammar Correction, and Language Translation.
- Used Google Gemini API to generate responses for summarization, sentiment, translation, and grammar correction with prompt engineering.
- Designed a sidebar-based user interface using `streamlit-option-menu`.
- Modularized features and used environment variables for secure API key access.
- Implemented response parsing, language detection, download functionality, and JSON output handling.

Diabetes Prediction Using Machine Learning Algorithms

Technologies: Python, scikit-learn, Pandas, Matplotlib

- Applied Logistic Regression, Random Forest, KNN, and Naive Bayes for diagnosis.
- Tuned hyperparameters and analyzed model performance using standard metrics.
- Predicted diabetes likelihood from patient data using ML techniques.

Achievements

HackerRank Achievements:

- 5 stars in SQL problem-solving.
- 5 stars in Python problem-solving.
